"Clincher" Paint

cunnected

We know a paint which holds to the wood like a driven nati - Seasoned lumber The point are the empty sap cells. White lead paint which dries on the wood in the form of a solid clastic film, fastens into these pore, and the whole cost of paint is actually riveted like armor plate to the surface it decorates and

Collier White Lead (Dutch Boy Trade Mark) and Pure Linseed Oil

make the paint that spreads into a vital body. It becomes a part of the would itself-an outer layer that preserves the hie of the lumber

We sell it as well as other painting requisites. Come in and have a talk with us about painting.
